NEDSPICE

Job title	SAP Business Expert
Location	Cochin, India.
Background	*Global SAP S/4HANA implementation project is in integration test phase. After this phase is completed Nedspice will work towards Go-live for part of the scope per 1 January 2021. India will go live in 2nd wave, which is estimated to be mid-2021. For India part of scope is still to be realized and more thorough testing is still required.* *The entire scope is built centrally by Itelligence.*
Role	*Candidate hired by Nedspice India should help implement the solution in India by supporting the local project team with testing and training, and by ensuring smooth communication between the business and the central implementation partner Itelligence. After go-live he/she should help embed the use of SAP in the daily processes, continue support to users and help maintain master data.* *Focus is on processes in Operations: Planning, Procurement, Production, Quality, Warehousing (inbound and outbound) and Transport Management.* *Candidate doesn't have to be 'expert' in all fields as long as he/she can convey hand-overs created by Itelligence.* *Candidate will report to director in India locally and to the central SAP Competence Centre in Rotterdam functionally.*
Duration	Circa 1 year (6 months till Go-live, and 6 months in Run phase) with option on full time.

Objective & result areas	• Support execution of integration test and UAT
	  ▪ Trouble shooting
	  ▪ Knowledge transfer to testers based on available hand over material
	  ▪ identify master data issues and train users in setup and impact of master data
	• Help coordinating testing and other project activities
	• Adjust training material to make it specific for locations in India
	• Identify issues in SAP setup and communicate to Itelligence consultants for resolution
	• After Go-live: Super Key User that helps local key users to develop in their roles

Explicitly out of scope	• (re-)designing the SAP solution • Configuring SAP (responsibility of Itelligence)
Skills & competencies	• SAP knowledge of MM, PP, WM, QM, TM • Understand integration with SD and FI/CO • Able to coordinate activities of teams • Business focused; used to work with business teams, not only with consultants • Train users • SAP support in hypercare and/or in SAP support team: able to handle many different topics in parallel.
